The age of a competitor is taken to be their age as at 31st October of the year of the competition for those categories where Senior National Assessment may be sought, and the date of the Championships for all other categories.

When setting the program, if competitor numbers are low, some sections may be run in parallel (although judges, and places awarded, separately).

A competitor may enter any event that they meet the criteria for i.e. there is no limit on the number of events that can be entered. However, the program will not specifically make allowances for those who choose to compete in multiple sections.

National Dress Standard is compulsory for dancers seeking National assessment. Dancers not seeking assessment are expected to wear rock'n'roll clothing but do not need to conform to the standard.

Although Best Dressed competitions are optional, all competing couples and triples teams must attend Best Dressed marshalling, to allow dress standards to be monitored where required.

For any areas of competition not specifically covered, it is assumed that National Association competition rules apply (See Association Rule Book A).
